

Internal Practical Exam-1 (Set A)

1. REACT APPLICATION:

The application is a web-based hospital appointment system. It features a navigation bar with links to Home, Doctors, and Book Appointment. The first screenshot shows the 'Hospital Appointment Dashboard' with a welcome message and a section for 'Recent Scheduled Appointments'. The second screenshot shows the 'Medical Specialists & Doctors' page, listing available doctors and their specializations. The third screenshot shows the 'Book an Appointment' form, which includes fields for Patient Name, Doctor Name, Date, Time Slot, and Reason for Visit, along with a 'Confirm Appointment' button. A live form state preview is also displayed on the right side of the form.

3. MONGODB:

The screenshot shows the MongoDB Compass web interface. On the left, the 'CONNECTIONS (2)' sidebar lists two connections: '127.0.0.1:27017' and 'bank'. The '127.0.0.1:27017' connection is expanded, showing a database named 'hospital_db' with several collections: 'admin', 'config', 'appointments', 'doctors', 'patients', 'local', and 'bank'. The 'doctors' collection is selected. The main panel shows the 'doctors' collection with 4 documents. The 'Documents' tab is active, displaying a list of documents. Each document is a JSON object with the following fields: `_id`, `name`, `email`, `specialisation`, `available`, `__v`, `createdAt`, and `updatedAt`. The documents are as follows:

- `{ "_id": "ObjectId('6a86c552a16769b171e0bc98')", "name": "Dr. Rajesh Sharma", "email": "rajesh.sharma@medcare.com", "specialisation": "Cardiology", "available": true, "__v": 0, "createdAt": "2026-08-20T09:13:54.126+00:00", "updatedAt": "2026-08-20T09:13:54.126+00:00" }`
